

OFFICIAL RESPONSES TO VENDOR QUESTIONS RFP-2018-DBH-07-EVALU

No.	Question	Answer
1.	The requirements of the cost proposal (Sec. 7.2.3.3, pg. 29) list completing Appendix D & Appendix E, both of which are requesting salaries of staff to determine the budget for the project. Would it be possible to instead use all-inclusive hourly billing rates since we are a for-profit professional services firm?	No. The Department is not requesting an all-inclusive billing rate. Appendix D, Budget requires vendors to complete a salary and benefits line item as well as any indirect costs associated with the salaries and benefits. Appendix E must include hourly rates and total amounts of salaries as well as the number of hours to be worked by each individual being paid from the contract.
2.	What, if any, existing population and outcome data sets does the State anticipate will be made available to the vendor? (e.g. through the Division of Public Health Services, Division of Community Based Care Services, Division for Children, Youth & Families, etc.)	Yes, the State will make available new data collected during the course of this grant period from all grant partners and treatment providers. Data from Medicaid payments and public health data will also be made available as needed. A lot of the public health data related to Substance Use Disorder at the population level is publically available on NH HEALTH WISDOM at https://wisdom.dhhs.nh.gov/wisdom/#main
3.	Does the State anticipate providing the vendor with any other data sets for analysis--for example data received by the State from an external source not otherwise described in the RFP?	Data collected and reports made from the planning grant partners will be made available to new contractor.
